EXPERIENCE

Senior Software Engineer
Brain Station 23 PLC
08/2024 - Present Dhaka, Bangladesh

- Currently working at Grameenphone as an augmented resource from Brain Station 23.
- Developing and optimizing key features for the MyGP app to improve user experience.
- Collaborating with cross-functional teams to ensure app stability and high performance.
- Leading the implementation of innovative digital solutions for enhanced app functionality.

Lead Mobile Application Engineer
Apprise IT
01/2022 - 07/2024 Dhaka, Bangladesh

- Full ownership of Android application development projects.
- Leading and mentoring a team of mobile developers.
- Implementing advanced features to enhance app user experience.

Senior Android Application Developer
Apprise IT
01/2021 - 12/2021 Dhaka, Bangladesh

- Developing Android application for live streaming.
- Analyzing user stories and participating in sprint planning, scrums, demos, and retrospectives.
- Communicating ideas across teams effectively and quickly solving problems as they develop.
- Providing architectural direction on behalf of the architecture.
- Performing peer code reviews for immediate and related teams.

Android Developer
Apprise IT
01/2020 - 12/2020 Dhaka, Bangladesh

- Integration with RESTful APIs
- Reactive Programming using RxJava
- Object-Oriented Principles and Design Patterns and Architectural patterns like MVC, MVP, MVVM
- Exposure to new Android jetpack components like Room, LiveData, MVVM, Paging3, DataBinding
- Used libraries such as Retrofit, Dagger2, Hilt, Agora SDK, Socket.io, FaceUnity, FaceGlBeautySDK, SVGA Player
- Exposure to debugging and analysis using ADB

Android Developer
Emos Bd Technology
02/2019 - 12/2019 Dhaka, Bangladesh

- Developing of Android applications and their integration with back-end services with huge pressure Developed Android applications integrated with backend services.
- Work with our API developers to provide data to the apps via RESTful APIs

Android App Development Trainer
Rise Up Labs
08/2018 - 12/2018 Dhaka, Bangladesh

- Teaching Android basic to advanced concepts
- High level Java programming
- Tech Android UI Design based on UX (User Experience)
- Add feature gesture of Android

SUMMARY

Senior Mobile Application Developer with 8.5+ years of experience specializing in Android and Flutter development. Expert in Kotlin, Java, Android SDK, Jetpack Compose, Flutter, and modern mobile architectures. Proven track record of leading teams and delivering high-performance, scalable applications with seamless UX. Strong expertise in RESTful APIs, third-party SDK integrations, UI/UX, and end-to-end mobile application development.

TECHNICAL SKILLS

Mobile Development
Android, Flutter, iOS (Beginner)

Programming Languages
Java, Kotlin, Dart, Swift, HTML, CSS, XML, Bootstrap

Android
Jetpack Compose, Android SDK, Material Design, XML Views, Navigation, Paging 3, Room, DataBinding, ViewModel, Lifecycle, Hilt, Retrofit, Coroutines, Flow, RxJava, WorkManager,

Flutter
BLoC, GetX, Riverpod, Provider, GetIt, Dio, GoRouter, Freezed

Architecture & Design Patterns:
Clean Architecture, MVVM, MVI, MVP, MVC, Multi-Module Architecture, Repository Pattern, Use Case Pattern, Builder Pattern, Singleton, SOLID Principles

Databases & Backend:
Room, Realm, SQLite, SQLDelight, Firebase, Hive, Drift, SharedPreferences

Third-Party Libraries (SDK)
Agora SDK, WebRTC, Socket.io, FaceGlBeauty SDK, FaceUnity AR SDK, VmaxSDK, Branch.io, Netcore SDk

Testing
JUnit 4, MockK, Unit Testing, Mocking

Version Control & Collaboration
Git, GitHub, Bitbucket, Jira, Trello, Slack, Code Review

Analytics & Monitoring
Firebase Analytics, Statsig, Datadog, Netcore

AI Tools
Cursor, ChatGPT, Gemini, GitHub Copilot, Claude

EXPERIENCE

Android App Development Trainer

Workspace Infotec Ltd

04/2018 - 07/2018 Dhaka, Bangladesh

- Teaching Android Basic to advance concept high level Java programming
- Tech Android UI Design base on UX (User Experience) add feature gesture of android

Junior Software Engineer

Dreamploy

01/2018 - 05/2018 Location

- Development of Android applications and their integration with back-end services with huge pressure
- Designed sophisticated architecture, skeleton of application, and creating quality products as client's requirement
- Working on Android SDK
- Working on remote data via REST API for online sync and also developed offline base apps for rural areas
- Working on third-party libraries and APIs
- Working on google Maps, Navigation, Tracking
- Maintained full mobile development life cycle
- Try to maintain time-management of product delivery
- Communicate with client for support

Intern Software Engineer

Akij Group

09/2017 - 12/2017 Dhaka, Bangladesh

- Work under System Analyst
- Responsible for application coding and testing
- UI Design based on UX (User Experience) to add feature gesture

TRAINING

Android Application Development

BITM

01/2017 - 04/2017 Dhaka, Bangladesh

Completed Android Application Development training at BITM in 2017, gaining hands-on experience in Android SDK, UI design, and API integration for building mobile applications.

EDUCATION

BSc in Computer Science & Engineering (CSE)

Daffodil International University

06/2013 - 09/2017 Dhaka, Bangladesh

PROJECTS

MyGP - Offer, Recharge, Sports

08/2024 - Present

MyGP is Grameenphone's flagship mobile app, serving millions of users with real-time account management, balance and data tracking, package purchases, and personalized offers.

Technical Responsibility:

- Led feature development and delivered scalable, user-focused solutions.
- Improved app performance, stability, and scalability through cross-team collaboration.
- Developed features using Kotlin, Jetpack Compose, MVVM, Retrofit, and Firebase.
- Integrated VMAX SDK, Branch.io, Ibadha SDK, and Netcore SDK.

Hive - Live Stream Video Chat

01/2020 - 07/2024

Hive App is a live streaming app that offers an interactive platform for users to broadcast, engage with an audience, and build a community in real time. It allows users to go live, participate in streams, and enjoy social experiences through live interactions.

Technical Responsibility:

- Led the Android development for the Hive app, focusing on enhancing live streaming functionality and user experience.
- Integrated real-time communication features using WebRTC and Agora SDK.
- Managed app performance, scalability, and ensured timely releases with a focus on high code quality.

POCO - Live Stream Video Chat

05/2021 - 07/2024

Poco App is a social live streaming platform where users can connect, broadcast, and engage with their audiences in real-time. It offers an interactive environment to build communities, send virtual gifts, and participate in live events and entertainment.

Technical Responsibility:

- Led the Android development of the Poco app, ensuring smooth integration of live streaming and real-time interactions.
- Worked on implementing core functionalities like Agora SDK for live streaming and WebRTC for real-time communication.
- Focused on optimizing app performance, scalability, and ensuring high-quality code with regular code reviews and testing.
